EXPERIENCE

Distrito, Remote — Senior *Frontend Software Engineer - React*

APR 2022 - PRESENT

· Collaborated with product and design teams to create fast and responsive interfaces, enhancing user experiences and contributing to team growth.

· Developed solutions to increase platform efficiency and performance.

· Decreased the number of bug-related tickets, positively impacting company profitability.

Main tech: **NextJs, React and TypeScript.**

V.Tal, Brasília, BR — *Full Stack Software Engineer*

JAN 2022 - APR 2022

· Developed features for internal employees and created automation jobs for simple and complex tasks, improving productivity.

· Decreased human action in numerous tasks, leading to increased efficiency in other areas.

· Used health checks results to proactively address issues, reducing the number of tickets.

Main tech: **PHP, Jenkins, Docker, SQL, React and JavaScript.**

Oi S.A, Brasília, BR — *Full Stack Software Engineer*

SEP 2018 - JAN 2022

· I worked on developing features for internal employees and created automation jobs for various tasks, including system health checks.

· Conducted monitoring in critical company systems, reporting failures and executing intervention and recovery procedures.

· Achieved a decrease in human action for routine tasks, enhancing overall productivity.

Main tech: **React, JavaScript, PHP, Jenkins, Docker and SQL.**

SKILLS

I have experience with a wide range of tools including:

NextJs, TypeScript, React, PHP, Docker and Jenkins

I've applied these skills in multiple projects both personal and professional.

LANGUAGES

Portuguese, English(B2)

IESB, Brasília, BR — *Associates degree, System Analysis and Development*

2015 - 2017

· Course focused on concepts about software engineering when I learned all the basic things to start in the area.
