SUMMARY

I'm a web software engineer. Currently I work with focused on the front-end side, but I also have experience as a full-stack developer. The main technologies that I use now are React and NextJS.

WORK EXPERIENCES

APRIL 2022 - NOW
Front-end Developer at Distrito

- Development of optimized and responsive web applications based on prototypes created by the UX team and working directly with the back-end team to integrate processes.

JANUARY 2022 – MARCH 2022
Systems analyst at V.tal S.A

- Development of web applications and automated flows that validate the health of the environment, and quickly report failures for greater agility in the actions of those responsible and in some cases, identifying the problem and already treating it without human intervention.

SEPTEMBER 2018 – DECEMBER 2021
Systems analyst at OI Móvel S.A

- Monitoring critical company systems, reporting failures to N2 teams and performing interventions and recoveries in some cases.
- Development of web applications and automated flows that validate the health of the environment, and quickly report failures for greater agility in the actions of those responsible and in some cases, identifying the problem and already treating it without human intervention.
